.. or maybe as his parrot? Like the films, players will board vessels, fight one another, plunder everything from gold to guns to victims of their very own thirst for treasure, and be steered by a series of enigmatic, treasure-seeking women known as "Women of the Sea". It is your last chance for glory as well as your last chance to be a hero. It's an interesting sort of game. It's very good, and very fun, but it's also one of the most confusing games I've played in a long time. Like the films, the gameplay is easy to understand, but difficult to execute well. It's for players who are happy to mess about on a boring quest that they're happy to do repeatedly - as the examples I gave at the beginning suggest - or who simply have the patience to work through the game's many obstacles, but who won't mind playing a story a few hours or a few weeks long. They've made lots of games in the past, and many of them have become classics. That's not necessarily a criticism of the games they've made - quite the contrary, since it's no bad thing for a developer to have a portfolio, a track record, to show to the public - but this game is very much rooted in their success. I think that does bring a fair measure of fun and success to it. And, in terms of how the game is made, it's very well done. You play as Jack Sparrow, a swashbuckling, pint-sucking, rum-swilling rogue with a penchant
