It is widely used in manufacturing plants and utilities for the design and cost estimation of heat exchangers and heat recovery units in single and multi -cycle plants. For example, it is used for: 1. Design and cost estimation for new heat exchangers 2. 3. Design and modeling for existing heat exchangers 4. 3. 2. 5. HTRI is an acronym for Heat Transfer Research Institute. HTRI was founded in 1993 as a non-profit non -governmental organization in Dubai, United Arab Emirates. The HTRI has three key tasks: 1. Computation 2. 3. Consultancy. HTRI has a recognized expertise in thermal design of industrial and commercial equipment. HTRI has also has a recognized expertise in engineering design of heat exchangers. Today HTRI has a large and diversified client base in the Middle East and internationally. HTRI's success has been due to its skilled staff, its advanced software and its emphasis on customer service. HTRI is a market leader in the middle east for providing engineering design and modelling services for energy efficiency, heat exchangers and boiler design. HTRI's software suites are used worldwide for thermal design of industrial and commercial equipment. HTRI is known for it's skill, experience and dedication to excellence. HTRI is known for an innovation with it's Xchanger Suite. Xchanger Suite is a software for the

design and modeling of heat exchangers. It is widely used in manufacturing plants and utilities for the design and cost estimation of heat exchangers and heat recovery units in single and multi-cycle plants. For example, it is used for:

HTRI removes tubes below nozzles if necessary to meet ρV^2 standards for TEMA shell entry. Sealing strips block the resulting large open area at the top. specific. If you need more information about parts or want to know more about how they are made and function, visit the

HTRI website. Nozzle seal inserts can be found at www.hri-m.com/hri-inspection.html. If necessary, you can order them through our online store. All of our temp section pipe plugs described in this chapter are available in standard (non-isothermal) or standard/isothermal designs.
