
Basic macro recorder and text editor MacVLAN is an easy to use and free application to create virtual local area networks (LANS). MacVLAN can create Mac OS X style LANS with user friendly interfaces. Multiple MacVLANs can be joined into a LANS network which allows for networking between connected devices. MacVLAN is also an application that provides a GUI interface for configuring and monitoring LANS. MacVLAN can be used with the host OS' built-in network capabilities (AirPort, Bonjour, etc.) or can be used in conjunction with Mac OS X Server. Key features: Create a Virtual LAN (VLAN) with User Friendly Interface Join multiple VLANs into a LANS network Easy Access, Connect and Share Files LANS can be assigned an IP Address Configure Advanced parameters for each VLAN Network Status and connectivity (broadcast, multicast, etc.) Monitor network activity Display VLAN statistics (bytes sent, bytes received, etc.) Create and join Mac OS X VLANs Simplistic Network Connectivity (static or dynamic) Small size, light and fast Runs under Mac OS X 10.6 and later versions Multiple VLANs Configure and monitor Mac OS X VLANs Create and join Mac OS X VLANs Easy to use and simple to use

BIOSdecrypt is a system utility designed to help restore the integrity of your BIOS password by decrypting encrypted BIOS passwords. Just insert the BIOS flash drive or the BIOS decrypted image file and click the decrypt button. The BIOS decryption process is a fully automated one. Key Features: It supports 64-bit Intel Macs, including Macs with Intel Core Duo, Intel Core 2 Duo, Intel Core i3, Intel Core i5, Intel Core i7, and Intel Xeon processor chips. It supports all Mac OS X v10.6 and v10.7 operating systems, including the Boot Camp v2, v3, and v4 installers. A file system or volume has to be selected, in order for decrypted BIOS password files to be stored and the BIOS decryption files to be used. You can also store the decrypted BIOS password files on any external drive. It allows the password recovery process to be performed without using a Recovery HD or an Internet connection. You can view the decrypted BIOS password files and the dec 70238732e0
