

AKTU Top 10 Management College in Delhi NCR

Overview of "management"?

Management is the art of effectively utilizing and coordinating resources to achieve organizational goals. It is a crucial concept in all types of organizations, be they businesses or non-business entities such as hospitals or schools. The success of an organization hinges on the efficient functioning of its management, which is necessary when the organization's resources, both human and non-human, work together towards a common objective. In today's complex and larger organizations, the importance of management has significantly grown. Traditional definitions of management were vague, as they failed to specify the tasks managers must undertake to achieve goals through others. Furthermore, these definitions depicted management as a manipulative practice that disregarded the needs of workers, treating them merely as a means to an end, regardless of the methods employed.

Importance and significance of management:

Effective management is the driving force behind the successful execution of organizational strategies. It ensures that great ideas are not only conceived but also implemented and scaled up. Whether it's a small startup or a Fortune 500 company, skilled management enables businesses to:

- Achieve goals by optimizing resources, establishing well-balanced departments, and executing well-thought-out plans.
- Make well-informed decisions through accurate monitoring systems and analytics.
- Reduce costs by eliminating redundant tasks and wasted efforts.
- Inspire teams by connecting their work to a larger vision and clarifying their roles.
- Quickly identify and address issues through the monitoring of key performance indicators (KPIs).
- Uphold standards of quality, brand, ethics, and legal compliance.
- Coordinate complex activities within specified timelines and budget constraints.
- Nurture talent by providing tailored training programs to enhance capabilities.
- Foster innovation by analyzing customer data to guide the development of new offerings.
- Maintain a balance between stability and agility, adapting to market changes when necessary.

Management characteristics:

Constant: This implies that management remains in effect as long as the company is operating. Each manager within an organization is responsible for carrying out various tasks in a specific order.

Intangible: Management is not a physical entity. This means that it cannot be physically touched or seen, but its presence can significantly impact how an organization operates. Effective management helps organizations reach their objectives, while poor management can cause an organization to struggle.

Dynamic: Management must be adaptable. It should be able to adjust to the ever-changing market conditions. For instance, restaurant management should be able to embrace and navigate the trends of online food ordering.

Multidimensional: Multidimensional management means that it should have a basic understanding of all the areas it oversees. A capable manager collaborates closely with all teams within the organization.

Description of management courses:

MBA:

The Master of Business Administration (MBA) is a program that extends over a period of two years and offers a comprehensive understanding of general management and business operations, emphasizing practical applications. Pursuing an MBA is highly desired and widely acknowledged in the world of business and management.

PGDM:

PGDM stands for Post Graduate Diploma in Management, a two-year program that focuses on equipping aspiring managers with the necessary skills to succeed in the business realm. This extensive course caters to the specific requirements of diverse industries, enabling students to gain technical expertise and interpersonal abilities, thus preparing them for a smooth transition into a managerial position.

BBA:

Bachelor of Business Administration (BBA) programs aim to provide students with a strong foundation in business subjects and specialized courses for specific areas of interest. By completing a BBA, students can enhance their management skills and prepare themselves for roles in business administration.

BCA:

In today's society, the Bachelor of Computer Application degree serves as the fundamental basis for computer science. The BCA program spans three years and is designed for individuals who wish to explore the fields of computer science, software engineering, information technology, information security, and networking technology.

Eligibility for management courses:

For admission eligibility, the candidate shall have passed HSCE (Standard XII, 10 + 2 pattern).

Graduation: 50%

Exams: CUET (PG, MAT, CAT, UPTAC, GMAT, and CUET).

Selecting a career is crucial, as it shapes our future. Therefore, it is essential to be discerning when making this decision. Opting for a management course can be a wise choice, as it offers numerous career opportunities. AKTU provides an ideal platform for pursuing this path.

Establishment of AKTU University:

On September 9, 2015, the government of Uttar Pradesh established Dr. A.P.J. Abdul Kalam Technical University (AKTU), which was previously known as UPTU. University Act defines 'Technical Education' as education, research, and training in various fields such as engineering, technology, architecture, town planning, pharmacy, applied arts and crafts, and other programs and areas that the central government, in consultation with the All-India Council for Technical Education (AICTE), may declare through notification in the Gazette.

An overview of courses:

AKTU has a wide presence across Delhi NCR and is responsible for overseeing the programs offered in 764 colleges and institutions. These programs include B.Tech., M.B.A., M.C.A., B.Arch., B.Pharm., B.H.M.C.T., M.Tech., and Ph.D. The university ensures that both government and private institutions throughout the state provide high-quality training in various fields, such as engineering, management, technology, architecture, pharmacy, hotel management, catering technology, as well as M.B.A. and M.C.A. programs.
