Made with **GAMMA**

# Mistake #1: Outsourcing Without a Clear Product Vision

## Poorly Defined Requirements

40% of project failures start here, causing scope creep and delays.

## Indglobal's Discovery Phase

Detailed Product Requirements Document aligns vision before development.

# Mistake #2: Neglecting Technical Leadership Evaluation

## Importance of Strong Leadership

Directly impacts product scalability, robustness, and code quality.

## Indglobal's Expertise

Senior architects average 12+ years leading complex software projects.

## Solution

Vet technical leadership and review architecture portfolios thoroughly.

# Mistake #3: Communication Breakdown & Cultural Barriers

## Common Challenges

- Miscommunication delays 57% of offshore projects
- Time zone and language differences cause friction

## Indglobal's Approach

- Transparent communication protocols
- Cultural alignment with clients

Regular updates keep teams synchronized and engaged.

# Mistake #4: Undefined Goals and Deliverables

1

## Vague Specs Cause Issues

35% of projects suffer costly rework due to unclear goals.

2

## Indglobal's Milestone Approach

Milestones ensure project alignment and measurable success.

3

## Solution

Create detailed roadmaps and success metrics before starting.

# Mistake #5: Neglecting User-Centered Design

## UX Importance

Poor UX leads to 70% higher abandonment rates.

## Design Early

Integrate UX/UI from project inception to avoid costly redesigns.

## Indglobal's Solution

Dedicated design team ensures user-focused product development.
