Common Refrigerator Problems Residents Face in Al-Ghirnatah

1. **Refrigerator Not Cooling** – Caused by compressor or gas leakage.
2. **Strange Noises** – Often linked to faulty condenser fan motors.
3. **Water Leakage** – Due to clogged defrost drains.
4. **Ice Build-Up** – Caused by defective thermostats or door seals.
5. **Power Fluctuations** – Affects refrigerator electronic boards.

Our **Experienced Fridge Mechanic Services Near Al-Ghirnatah, Riyadh** address these issues with modern tools and genuine spare parts, ensuring durability.

Best Practices To Maintain Your Refrigerator

- Clean condenser coils every 6 months.
- Avoid overloading shelves to maintain airflow.
- Set optimal temperature between 3°C and 5°C.
- Regularly inspect door seals for cracks.
- Schedule preventive maintenance at least once a year.

These simple tips minimize breakdowns and extend the lifespan of your refrigerator.
