www.toolfix.com.au

When you're working at height, every connection matters. There's no room for shortcuts – and no tolerance for failure. That's why we stock a range of heavy-duty height safety rivets built to hold firm when it really counts.

Whether it's construction, maintenance, or industrial work, these rivets are designed to keep things tight, strong, and safe – even under pressure.

What's in the Range

- **Structural Rivets**

Made for the hard stuff. These are your go-to when you need serious shear and tensile strength – solid, reliable, and built for load-bearing jobs.

- **Stainless Steel Rivets**

Tough, rust-resistant, and made to last. These are ideal for marine environments, outdoor work, and anywhere corrosion is a risk.

- **Multi-Grip Rivets**

One size doesn't fit all – but these come close. They adapt to a range of material thicknesses and help keep your inventory simple and efficient.

Why Use Toolfix Rivets?

- **They Don't Quit**

Built to withstand tough conditions – heat, pressure, movement – and stay exactly where you put them.

- **They Cover a Lot of Ground**

From roofing and scaffolding to rail, rigging and safety gear – we've got the right rivet for the job.

- **They Handle the Elements**

Made from quality materials that can take the weather. No rust. No early failures.

Why Toolfix?

With decades of expertise, Toolfix is your trusted partner for fastening solutions. Our commitment to quality and innovation ensures that every product meets the highest standards.
