

AVIBULB – HIGH-STRENGTH BULBING BLIND RIVET

[Avibulb](#)

The **Avibulb** Rivet from MIS Tools is a bulb-forming, blind rivet engineered for exceptional tensile and shear strength. It's ideal for thin, soft, or precision-critical assemblies, offering reliable structural integrity and long-term performance

Superior Strength & Bulbing Tail Formation

Delivers high shear and tensile strength, creating a bulb-shaped tail that spreads load evenly on the blind side, protecting thin materials from stress.

Excellent Hole Compensation

Fills oversized, slotted, or misaligned holes effectively—offering consistent performance even in imperfect fits.

Retained Stem Design

Eliminates rattling, electrical hazards, and unwanted movement, ensuring secure vibration-resistant joints.

The **Avibulb** Rivet is a robust, smart solution for demanding blind-rivet applications—combining strength, durability, and precision. Engineered to handle challenging materials and conditions, it ensures reliable fastening across industrial, automotive, and electrical sectors.
