

# Find Your Perfect Ride with Kona Bikes Collection

Kona didn't show up in 1988 just to make another bike. They wanted to rip up the old plans and build something that felt like pure freedom. They build bikes for people who actually ride, focusing on performance and reliability. Here at Bike Zone, we get that. We think Kona bikes are just what you need for Aussie conditions. They're built to become an extension of you, whether you're on city streets or dusty back roads.

## **The Kona Lineup at Bike Zone**

We reckon our range of Kona bikes is second to none, and our pricing is sharp. We stock the models that matter, built for how Australians really ride.

### **Kona Gravel Bikes**

If you're looking for adventure, Kona gravel bikes are the answer. They're tough, versatile, and ready for anything you can throw at them.

## **The Rove and Libre**

The Rove is a real workhorse with its Cromoly frame and heaps of room for chunky tyres. It's perfect for those long rides on country roads. The Libre is for those chasing speed. It's got a lightweight carbon frame ready to tear up local gravel races.

## **City and Touring Models**

For daily commuting, Kona's city bikes have you covered with their light aluminium frames and dependable disc brakes. Its rugged steel frame, rack mounts, and bar-end shifters are ready for a cross-country journey.
