## WHY WE CHOOSE EPOXY FOR SHOWER REGROUTING MELBOURNE

Some folks reckon cement grout is fine if you seal it, or that epoxy is too rigid. Honestly, those are just myths. At Save 'n' Seal, we know what actually stops leaks. We only use waterproof epoxy for our shower regrouting services in Melbourne. It's non-porous and gets rid of that trapped water that causes serious trouble.

- Myth Buster: Cutting out the old grout won't damage your membrane when done by pros.
- The Relief: Knowing everything is sealed properly now, preventing future water damage. That's what Terry B felt after her shower service in Altona!

## SAVE 'N' SEAL'S RESCUE PLAN

Getting a perfect shower service in Altona is simpler than you think. We try to keep things easy and transparent for our shower regrouting Melbourne clients.

- Enquiry & Inspection: Give us a buzz! Janelle will chat with you, and then Ben comes out for a free inspection and quote. No hidden costs.
- The Seal: We cut out the old, porous grout, vacuum the water, and then do a full tile regROUT with waterproof epoxy. Done in a day.
- Support: Save 'n' Seal stands by its warranty. Just ask Kate B, who loved how professional we were and how clean the place was left after her shower service in Altona.
