# Why DevSecOps Matters

Integrating security into the DevOps process is essential for **accelerating secure delivery** of software. As cyber threats rise, proactive measures are key to maintaining business integrity.

[READ MORE](#)

# Top DevSecOps Trends

## AI AND ML

The integration of **Artificial Intelligence (AI)** and **Machine Learning (ML)** enhances threat detection capabilities by rapidly analyzing patterns and anomalies, enabling teams to respond to threats proactively.

## SHIFT-LEFT SECURITY

Adopting **Shift-Left Security** practices allows organizations to incorporate security measures earlier in the development cycle, ensuring vulnerabilities are identified and addressed before they escalate into significant issues.

## CLOUD-NATIVE SECURITY

With the rise of cloud computing, **Cloud-Native Security Enhancements** focus on securing applications designed for cloud environments, addressing unique challenges and ensuring robust protection against evolving threats.

# Top DevSecOps Trends

## **ZERO TRUST SECURITY**

Zero Trust Security models enforce stringent access controls, ensuring that only authenticated users can access sensitive information, thereby minimizing vulnerabilities in a constantly evolving threat landscape.

## **CONTAINER SECURITY**

As container technology continues to dominate, securing container environments is essential. This includes monitoring vulnerabilities in images and ensuring proper configurations to safeguard applications.

## **COMPLIANCE AS CODE**

Implementing Compliance as Code automates regulatory checks throughout the development lifecycle, enhancing adherence to standards while streamlining compliance processes for organizations in a dynamically regulated environment.

# Indglobal's Expertise

**JOHN DOE**

CTO at Tech Solutions

“Working with Indglobal transformed our approach to security. Their DevSecOps expertise has accelerated our delivery processes while ensuring robust security measures. We have seen a significant reduction in vulnerabilities and a smoother workflow overall.”
