

World Wire Cables
Cable Solutions

Improve Your Safety System Performance with WS52W Cable

www.wwcables.com.au

Designed for high-performance safety applications, **WS52W cable** provides dependable power and signal transmission while helping reduce flame spread and smoke emission in the event of a fire. These cables are commonly installed in commercial buildings, hospitals, transport infrastructure, industrial facilities, and other environments where uninterrupted operation of essential systems is required.

Suitable for emergency lighting, fire alarm systems, evacuation systems, and essential infrastructure projects, WS52W cable solutions are manufactured to meet demands for fire resistance and durability.

Built with advanced fire-resistant insulation and protective sheathing, World Wire Cables provides WS52W cable that supports applications such as emergency lighting, fire alarm systems, smoke extraction systems, evacuation controls, and critical communication networks. The robust construction also offers strong resistance to heat, mechanical stress, and environmental conditions, making it suitable for long-term use in challenging installations.

What Do We Offer?

With strong industry experience, offering a wide range of power, control, data, and fire-rated cable solutions, our products are designed for safety, durability, and consistent performance while complying with relevant Australian standards for quality assurance. With reliable supply capability for projects of all sizes, World Wire Cables support

industrial, commercial, infrastructure, and energy sectors through solutions focused on long-term reliability and efficient installation. Backed by strong technical knowledge and support, we also provide guidance to project-specific requirements.

With our focus on safety, performance, and durability, World Wire cables remains an important choice for engineers, contractors, and infrastructure projects requiring trusted fire-rated cable technology and dependable electrical protection.
