services Cambridge**

Hair Coloring Services Cambridge: The Consultation

Your professional hair stylist will ask questions about previous treatments, your daily lifestyle, and maintenance expectations. They will also assess your skin undertones and evaluate your hair's current condition. Also, your stylist looks through your inspiration photos.

Understanding Hair Colouring Services Cambridge

When it comes to popular hair colouring options, they include full colour (global application), root touch-up, balayage, highlights and lowlights, toner services, and colour correction. Your stylist will help you choose the right option.

Your Stylist Will Prioritize Hair Health First

A specialist cares more about the condition of your hair. They will evaluate your [hair's structural health](#) first. They will test your porosity and its elasticity. If your hair is currently dry, brittle, or damaged, your stylist may recommend a restorative protein or bond-building treatment before proceeding. A perfect look often requires a multi-appointment journey.
