A locker is only as useful as the way its space is set up inside. Plain units hold things, yet the right [locker accessories](#) turn them into storage that fits how people work, train and study. OzLoka® New Zealand offers a full set of extras designed for its A to E and H series lockers, along with the F series phone locker. Small additions can make a big difference to how tidy and secure a room feels.

Locker Accessories That Make Each Door Work Harder

Shelves split tall compartments into levels, so helmets, books and lunch boxes stay off the floor of the locker. Clothes hooks and rail hooks give jackets and uniforms somewhere to hang between shifts or classes. Gym bags and work boots then fit neatly underneath.

On the outside, sloping tops stop bags and boxes being stacked on the roof, while kicker bases lift units off the floor for easier cleaning. Number Plaques make allocation simple and a phone cubby adds a small locked space for devices inside the A, B, C, D and H series. Each of these small changes keeps the room easier to manage.

Lock options can be matched to the site too:

- Standard and key locks for everyday use
- Padlock options with a tether if required
- Combination and digital combination locks for keyless access
- F series phone lockers with standard or tethered padlocks

What Sets Our Accessory Range Apart

Every accessory is designed to fit our lockers properly, so there is no guesswork about sizes or mounting points. Because the lockers are made from heavy duty polyethylene, the fittings work alongside a body that won't rust or dent. Choosing accessories at the time of ordering also means everything arrives together.

Our NZ team can recommend combinations based on who will use the lockers and what they need to store. That advice saves ordering extras that never get used and keeps budgets on track for schools and councils.

Benefits of ordering with us:

- Accessories matched to each locker series we supply
- Practical advice from a New Zealand team
- One supplier for lockers, locks and extras
- Quotes that cover the full setup in one

Plan Your Locker Setup Today

Share how many lockers you have or plan to order plus who uses them, then expect a suggested mix of locker accessories to match. The full accessory list is waiting at [http://www.ozloka.co.nz](#) for anyone who wants to browse first. Questions can also go to the team on 0800 377 112.E
